SUMMARY

Software Engineer with 3+ years of experience building and shipping web and mobile applications, as well as AI-powered solutions. Proven track record leading technical teams, delivering projects on time, and bridging frontend development with backend and AI integration. Experienced across the full stack with hands-on experience designing AI agent pipelines, deploying microservices, and building production-grade features.

EXPERIENCE

Software Engineer **Mar 2024 - Present**

FYI.AI *Dubai, UAE*

- Maintained and enhanced a production-grade application over 18+ months, working across Java, C++, and Node.js to deliver reliable, cross-functional solutions.

- Designed and implemented a complete AI agent pipeline for STT, LLM integration, and TTS using Python and FastAPI.

- Built and deployed AI-driven microservices using Docker, enabling a scalable and modular architecture that improved system performance and reliability.

- Developed and maintained Node.js/Express endpoints and microservices to support core application functionality and cross-service communication.

- Flashed and configured NVIDIA Jetson devices for on-device AI model inference, enabling compact and efficient deployment of ML workloads.

- Built and delivered a white-label version of the application for ASU, featuring a personalized education experience with lecture content, AI personas, and adaptive learning flows.

- Delivered key app features including accessibility enhancements for text and calls, AI-automated reminder calls, and real-time chat functionality.

Frontend Engineer **Mar 2022 - Nov 2023**

AMMRHA Foundation *Damascus, Syria*

- Led a technical team of 15 engineers, overseeing the delivery of 10+ projects with a 100% on-time quality adherence record.

- Collaborated with senior leadership to define company objectives and align product releases with strategic goals, resulting in a 20% improvement in organizational alignment.

- Introduced a structured post-launch evaluation process that reduced

compliance issues by 20% and saved an average of 10 hours per project.

- Coordinated regular cross-functional meetings with project managers to ensure consistent progress tracking and goal alignment.

- Built and shipped multiple web applications using React.js, Node.js,

Tailwind CSS, and MySQL, contributing to a growing product portfolio from the ground up.

- Owned the full frontend lifecycle across several projects, from component architecture and state management to API integration

and testing.

EDUCATION

ASPU **Sep 2018 - May 2023**

Bachelor Of Information Technology In Artificial Intelligence *Damascus, Syria*

SKILLS

Technical Skills: JavaScript, React.js, HTML5, CSS3, SCSS, Tailwind CSS, Redux, Context API, React Hooks, Node.js, Express, REST API, MySQL, Firebase, Python, Django, FastAPI, Docker, Microservices, Java, C++, C#, QML, PHP, Postman, NLP, CNN, OpenCV, Pandas

Languages: English (Fluent), Arabic (Native)

Additional Skills: Cross-functional Collaboration, Technical Leadership, Agile Project Management, Product Ownership Mindset, Stakeholder Communication, Mentorship & Team Development, On-time Delivery & Quality Adherence

CERTIFICATIONS

- Exploratory Data Analysis for Machine Learning May 2023
- World Robot Olympiad Participant August 2019
